

I am distressed to find that there is a possibility that FM station 90.7 (KLOVE) may lose its priority status to a LPFM station. My family and I are avid listeners and supporters of this national station and would be heartbroken if this area were to lose its signal. There are very few stations that offer the values and quality that 90.7 offers, and although it is a national broadcast, KLOVE does its part in promoting non-profit events in the community-advertising that is free of charge to these non-profit groups. In today's world, where sex, violence, and hate speech rule the air waves, KLOVE offers hope and a compassionate message through its music and programming. Please take this into consideration before you allow a LPFM station to take over this signal. Our community would be lacking in a family appropriate station that offers an alternative to much of the obscenity that dominates radio. I thank you for your consideration.
